

After Rinse is a specially formulated encapsulating low pH rinse that can be used as a stand-alone cleaner, or as a final step in wet cleaning.

After Rinse will remove any traces of detergent residue left behind from current or past cleaning. From residential carpet to heavily traveled commercial carpet, fibers are left clean and soft with no sticky residue left behind.

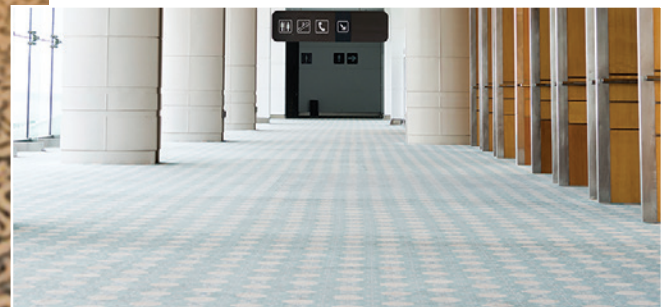

After Rinse will also help prevent browning or yellowing on lighter colored carpets. As an added benefit, **After Rinse** contains our encapsulating technology, that will help prevent rapid re-soiling and wicking. It is ideal for most carpeting and is especially recommended for oriental and all white or pastel colored synthetic carpets.

Key Benefits of using After Rinse

- Removes excess chemical/disinfectant over spray residue
- Removes excess soap residue from previous cleaning
- Neutralizes carpet pH, turning the fiber back to its acid state
- Fibers are left clean and soft with no sticky residue left behind

Benefits of adding Encapsulating technology

- Leaves no harmful residue
- No rinsing required
- Prevents soil wicking
- Eliminates rapid re-soiling
- No sticky residue
- Carpets stay cleaner longer

After Rinse can be sprayed after shampooing or used in hot water extracting to balance the pH of the carpet fibers.

DIRECTIONS: Shake well before using. Test fabric in inconspicuous place for color fastness before using.

1. Add 4 to 6 oz. (120 to 180 mL) of **After Rinse** to 1 gallon (3.78 L) of water.
2. Spray with an electric or pump type sprayer to the water safe fabric or carpet.

EXTRACTION: To prepare carpet for extraction cleaning, vacuum or use the Model S Pile Brush to remove dry soil.

PORTABLE EXTRACTION: Add 2 oz. (60 mL) of **After Rinse** for each gallon (3.78 L) of water.

TRUCKMOUNT EXTRACTION: Add 1 quart (946 mL) of **After Rinse** for each 5 gallon (18.9 L) of water to make concentrate. Set chemical metering system at 2 GPH

1. Proceed in cleaning carpets.
2. Finish carpet with a nap brush.

Always use furniture protectors under legs of furniture replaced on damp carpet. After using **After Rinse**, all mechanical equipment should be rinsed with plain water to prevent corrosion.

NOTE: Freezing will not affect cleaning power. Thaw, shake well and use.
