

Digest Solids And Eliminate Odors

Odor, Grease & Waste Eliminator

Nilozyme® **Trap & Drain Treatment** contains multiple strains of bacteria, which allow for faster breakdown of organic matter. This trap and drain treatment will liquefy and consume complex proteins, cellulose, starches and other organic waste found in grease traps, drain lines, septic tanks and lagoons.

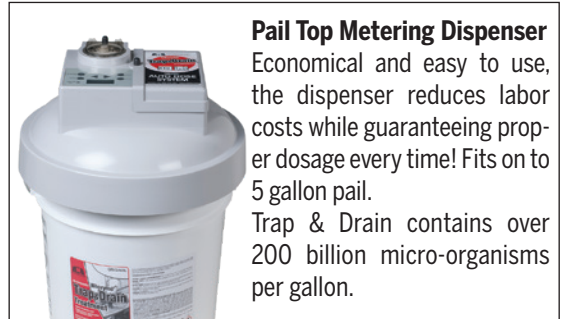

Nilozyme® is non-pathogenic, non-corrosive and certified salmonella and pseudomonas-free.

- Grease Traps
- Kitchen Drains
- Septic Tanks
- Garbage Chutes
- Lagoons
- Restroom Drains

Key Benefits of Nilozyme® Trap & Drain Treatment

- Reduces drain odors
- Improves drain flow
- Reduces maintenance costs of grease traps

Trap & Drain can be applied manually or dispensed

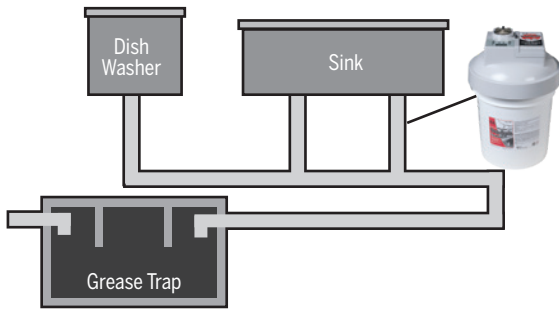

Pail Top Metering Dispenser

Economical and easy to use, the dispenser reduces labor costs while guaranteeing proper dosage every time! Fits on to 5 gallon pail. Trap & Drain contains over 200 billion micro-organisms per gallon.

NSP-1733

Nilozyme® **Trap & Drain** contains multiple strains of bacteria, which allow for faster breakdown of organic matter. Trap & Drain contains over 200 billion micro-organisms per gallon.

DIRECTIONS: Shake well before using.

KITCHEN, LAUNDRY, BATHROOM DRAINS: Pour or inject 3-6 oz. (89-177 ml) into drain twice weekly.

GREASE TRAPS: Large volume restaurants (fastfood), 18 oz. (532 ml) daily. Small/medium, 8-10 oz. (237-296 ml)

SEPTIC TANKS: For initial treatment, pour 1 quart (946 ml) of Trap & Drain for each 500 gallon capacity. Thereafter, add 16 oz. (473 ml) for each 500 gallon capacity once a week.

LAGOONS: For initial treatment, add 5 gallon (18.9 L) of Trap & Drain per acre surface. Thereafter, use 2 gallon (7.57 L) per acre surface weekly.

GARBAGE CHUTES: Mix 4 oz. (120 ml) Trap & Drain with 16 oz. (473 ml) of water (1:4) and pour, inject or spray into chutes or dumpsters daily.

Trap & Drain Treatment Automatic Dispensing System

Nilodor's Auto Dose dispenser utilizes the flexible programming capabilities which allows the user to dose drains with Nilozyme® at the appropriate times of the day. An easily programmed timer turns the pump on and off to ensure the regular dosing of Nilozyme®.

- Corrosion resistant cabinet fitted to pail or wall for demanding environments.
- Easy to program timer with pin lockout for security.
- During normal operation, the timer runs on the same power source as the pump, simplifying system maintenance (only one set of batteries to replace).
- Internal backup battery in timer maintains program even when main power source is disconnected or inoperative.
- Automatic battery-life monitoring technology ensures dosing accuracy throughout life of battery.
- No tools required for maintenance of pump assembly.
- Low battery indicator.

Batteries required to run the units are not included. Models run on eight D-size batteries (alkaline batteries suggested).
