C324-005

Diluted pH 7-8

DIRECTIONS: Shake well before using.

Test fabric in inconspicuous place for color fastness before using.

1. Absorb all excess with a clean white cloth or paper towel.
2. Pour clean water over the spot, and blot/absorb excess with white cloth, paper towel, or extractor.
3. Apply liberal amounts of **Fresh Spot** to spot. Blot with a white cloth or paper towel.
4. Rinse spot several times with clean water and absorb with a clean white towel, paper towel or extractor.
5. Place a clean white towel over the spot, and place a non bleeding weight on the towel to help wick excess water and spotter into towel.
6. Allow to completely dry, then remove the towel.

Repeat if necessary.
