### Presaturated Cleanroom Wipes

- Reduce the use of squirt bottles and dipping cans
- Reduce the amount of isopropyl alcohol used
- Use the exact percentage of IPA each application
- More even distribution of alcohol on the wipe and hence the wiping process
- Fewer VOCs (Volatile Organic Compounds)
- Safer to use, ship, and store than flammable liquids
- Convenience: No pouring, spraying, filtering, or diluting

**A 70% concentration of ethanol or isopropyl alcohol has been demonstrated to be the most effective.** Water acts as a catalyst and plays a key role in denaturing the proteins of vegetative cell membranes. The water content slows evaporation, therefore increasing surface contact time and enhancing effectiveness.

## The revolutionary SPHERGO® Flat Surface Cleaning System

The SPHERGO® surface-cleaning base tool together with MicroWorks® microfiber cleaning pads — was developed specifically to address problems presented by using traditional rag cleaning and wiping systems for flat surfaces.

Musculoskeletal disorders (MSDs), including back and trunk injuries, carpal tunnel syndrome, bursitis, and tendinitis, are cumulative “ergonomic injuries” that commonly occur in workers in the cleaning and sanitation industry. The costs of MSDs to businesses can be massive in both human and financial terms.

### SPHERGO® Flat Surface Cleaning System

- Faster and more efficient – greater surface area is cleaned in one motion
- Improves productivity, reduces fatigue, increases job satisfaction
- Medium base tool for use with 5" x 11" microfiber flat pad for horizontal and vertical flat surfaces (counters, walls, windows, etc.)
- Large base tool for use with 5" x 16" microfiber flat pad and telescoping handle for floor care
- Lightweight: SPHERGO® medium tool plus pad weighs less than 0.5 lbs; SPHERGO® large tool plus telescoping pole w/socket weighs less than 1.5 lbs
- Hook and loop fabric for attaching microfiber pad
- Telescoping pole w/snap-in socket adjusts up to 62" for floor applications
- 24" extended reach pole w/socket for hard-to-reach areas
- Tools can be incorporated into existing microfiber protocols

**Patent-pending spherical ball handle** is engineered for optimal ergonomic comfort, allowing a more neutral positioning of the wrist for greater comfort and productivity while minimizing musculoskeletal stresses common to manual cleaning processes.

# Cleaning is a Virtue with Virtu-Clean™ Disposable Cleaning Pads

## Charge once, even coverage, and a cleaner floor.

Not all cleaning pads are equal. Absorbency rates, release rates, coverage, and linting can vary greatly, significantly impacting the finished product. Virtu-Clean™ Disposable Cleaning Pads are specially engineered for critical environments, giving you maximum coverage, cleaning, and convenience. Our disposable, single-use mop pads check all the right boxes – they hold more liquid, release that liquid at a controlled rate over a larger surface area, and reduce friction for more effort-free cleaning.

## What is Microfiber?

Soft, ultra-absorbent polyester (80%) and polyimide (20%) fibers are split until they are thinner than silk. Microfiber pads average 200,000 microfilaments per square inch. One strand of MicroWorks® Microfiber is several hundred times smaller than a strand of cotton. The wedge-shaped, lint free, hypoallergenic microfibers lift and trap dust, grime, and moisture without harming/scratching delicate surfaces.

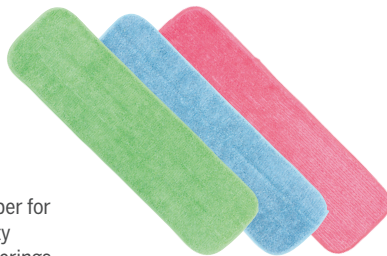

**Greener** - Uses 95% less water and chemicals than a traditional cleaning system. Durable pads launder for reuse, reducing solid waste.

# The right sorbent for every spill

## Sorbent Types

 Sorbents that have recycled content are marked with this symbol in the sorbent products section.

**Standard universal sorbents** absorb both oil and water based fluids. Typically gray in color. Best choice for most indoor spills.

**Oil Only Sorbents** absorb oil/ hydrocarbon based fluids and repel water. Typically white in color. Most effective when used outside.

**Hazmat sorbents** are also universal and absorb aggressive chemicals or unknown spills that can be both oil and water based. Yellow is a universal color for safety and caution and provides high visibility. The color coding will easily identify these sorbents in an emergency and warns that hazardous fluids may have been absorbed into the product. These sorbents can withstand chemicals and will keep compliancy with a growing number of local, state and federal regulations. For indoor and outdoor use. *Hazmat Sorbents available upon request.*

## Sorbent Formats

**Sorbent Pads** are the fastest way to clean up a spill and the most popular format

**Sorbent Rolls** are designed primarily to cover large areas and walkways.

**Socks** are used to soak up or create a barrier to contain the spill.

**Pillows** are used to absorb leaks too large for a pad.

**Booms** are an ideal solution to contain and absorb large spills in water and on land.

**Drum top pads** absorb fluids that result from messy drips and spills from the drum dispensers.

**Rugs and mats** can be used on walkways that may often be wet, for safety purposes to provide good traction.

**Emergency response spill kits** help prepare any facility with everything needed for fast response to unexpected spills.

**Truck spill kits** are compact and can be easily stowed for convenient access when a spill occurs.

## Sorbent Technologies

### Meltblown

Made from 100% polypropylene. Most commonly used sorbent technology. Available in oil only and universal.

### Air Matrix™

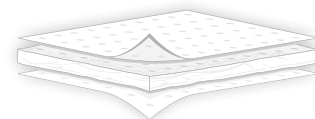

Oil only. Made from 100% premium recycled polypropylene primarily recycled plastic bottles and other recycled synthetics.

### Ultraclean™

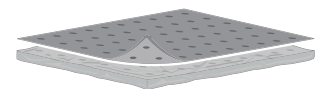

Universal only. Made from a blend of recycled synthetic fibers for balanced performance of water and oil equally.

## Sorbent Construction

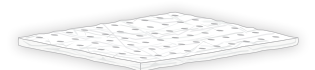

**Fine Fiber** increases absorbency rate, wicking, capacity, and fluid retention.

**Lamination** adds strength and reduces linting.

**Sonic Bonded** will enhance sorbent durability.

# Sorbent Weights

Weight is chosen based upon amount of fluid to be absorbed and required sorbent durability.

**Light weight  
(150-199 gsm)**

Great for small leaks and spills.

**Medium weight  
(200-249 gsm)**

Very absorbent but not as durable as heavy weight.

**Heavy weight  
(250-299 gsm)**

The industry standard with added durability and absorbency.

**Extra heavy weight  
(300-440 gsm)**

Premium and durable for heavy duty applications.

# The new standard in toilet seat cover systems

## The first and ONLY hands-free toilet seat cover system

Introducing the new patent-pending Evogen® High Capacity hands-free toilet seat cover dispensing system. Increased capacity translates into costs savings with less service time required to maintain.

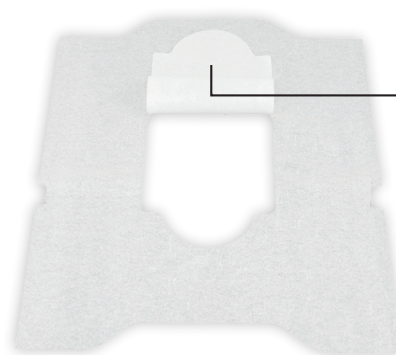

The system is fully contained, that is, there is no unhygienic pre-displaying of product. Instead, all seat covers are kept clean inside the dispenser. Then, with a wave of the hand, a single cover is dispensed automatically. And the seat cover is presented from the dispenser in full and ready to use — not folded and no tabs to tear.

By design, the Evogen® No-Touch toilet seat cover utilizes the highest quality flushable paper for a superior sanitary barrier.

Customers expect hands-free technology in the restroom. It's time the toilet seat cover joins the higher level of customer expectation. That's Evogen® No-Touch — hands-free satisfaction.

### Evogen® NT No-Touch Toilet Seat Cover System

- No-Touch – hands free dispensing
- Dispenses one toilet seat cover at a time
- Eliminates plumbing problems caused by malicious use - patrons grabbing a handful from an open dispenser
- Empty indicator - A flashing red light on the front of the dispenser indicates you need to refill the dispenser
- Easy front load access for refill
- Similar foot print to existing dispensers
- Improves the image of the restroom
- Extended battery life – only operates when dispensing (uses 4 “AA” batteries)
- There is a power indicator light to the left of the battery housing that will alert staff when it is time to replace the batteries (refer to inset)
- Holds 2 packs of refills, up to 250 seat covers
- Increased capacity cuts down on service time for maintenance staff
- Covered by one or more of the following US Patent Nos. 10,888,203 and 11,109,724

Auto flush tongue flushes seat cover down with the water

No client should ever smell anything unpleasant anywhere in any facility. Cleanliness of the restroom is one of the most important factors in the overall patron perception of an establishment. A poorly maintained restroom can turn clientele away from an establishment permanently.

Every commercial enterprise should incorporate some form of ambient scenting as part of its marketing strategy to increase traffic and customer satisfaction. The AirWorks® Complementary Air Care System is created with products that have corresponding fragrances of varying intensities, creating a uniform scent throughout the space.

- VOC compliant in all 50 states

#### Micro-Tube Patented Technology

Releases a fresh burst of fragrance with use and helps avoid offensive splashing inside and around the urinal keeping both the facility and the patron clean and dry.

Nilodor's exclusive Single Scent Solution ensures a coordinated fragrance for all steps of cleaning and odor control.

Co-mingling multiple scents may lead to a more offensive odor than the one you're trying to eliminate. Additionally, it can lead to people wondering what malodor you are trying to hide.

Single Scent Solutions are extensive. These products address all four stages of restroom odor control and cleaning.

Single Scent Solutions are denoted with this symbol in the odor control section.
